*ELASTIC
SUPPORTS*

ELASTIC SUPPORTS

The elastic support is made of superior material. The unique elastic bandage combines extra strength, durable elastic with soft, absorbent rayon/cotton fabric which provides firm and comfortable support.

To be applied for a series of knee and elbow supports. The unique dart-structured elastic stretches when bending. This can offer breathable and controlled compression. Contoured shape by cutting and handmade rubberizing on seams are specially designed for firm and effective support. Non-roll edges prevent slippage. Wrinkle or ride-up when wearing.

As to ankle and wrist supports, the dual tension elastic puts greatest compression at middle where it is most needed, less tension at edges to prevent cutting or pinching. Seams are sealed with rubber to lock in elastic yarns at cutting edges and thus preserve the strength of the support. Flat seams, less bulk and absorbently soft fabric can assure users with firm support and comfortable fit when wearing.

The elastic support is an ideal aids for use as a support during sports or work activities and exercise therapy, also suitable for use in long term rehabilitation or post-operative therapy.

The elastic support is an effective support for improving or reducing the effects of sprains and strains, injured ligaments, aching joints and muscles, weak or swollen condition around applied areas

HKNE500- KNEE SUPPORT

SIZE : 3 (Small) 5 (Medium) 7 (Large)
8 (X-Large) 9 (V-Large)

COLOR : T (Flesh)

- ★ *Dart-structured elastic.*

CERAMIC HEALTH SUPPORTS

The superior and latest hi-tech material "CERAMICS" is fully compounded into the special paint and dotted with the special printing technique on the fabric. Afforded by human body temperature and warm sunshine, this material does naturally release the far-infrared rays, like an infrared lamp, reflecting the radiating heat and energy to the body. At present, "CERAMICS" is widely used in a number of everyday health care products, such as waist, wrist, elbow, shoulder, head, neck, knee and ankle supports.

Ceramic health supports are the new-developed products in the world. It becomes one of hot items in the markets for the time being, particularly in Japan and Oriental countries.

When the far-infrared rays of "CERAMICS" and the field of magnetic force lines act on the body, they will induce a weak current to flow to the body and reflect a radiation to create the consonance with the moisture and temperature inside the body, thus activating metabolism, improving circulation, stimulating nervous systems, maintaining the temperature of the body, softening sticky muscle, decreasing the possibility for lumbago and sore back, relieving discomfort, pain, stiffness and fatigue, curing the constipation, and so on.

Ceramic health supports adopts the material which is flexible and ventilative to provide comfort and immobilization. The printed side supports against the skin should be for better effects. If sensitive to neoprene, a thin T-shirt could be put on underneath the Ceramic.

SUPPORTS FOR WAIST

SIZE CHART:

CODE	SIZE	CIRCUMFERENCE OF WAIST AT NAVAL	
3	SMALL	27-35IN	68- 89CM
5	MEDIUM	33-41IN	84-104CM
7	LARGE	39-47IN	99-120CM
